

Elements of Green Building Implementation

WCC Aeronautical and Technological College – Binalonan integrates green building elements across its facilities to promote sustainability and efficiency. Key initiatives include lighting zoning and renewable energy use for energy efficiency, indoor air quality measures such as CO₂ monitoring and daylighting, and designated parking for green vehicles. The institution also implements material reuse, recycling, and proper waste management practices, along with rainwater harvesting systems to support water conservation. Through ongoing innovations like solar and wind power initiatives, WCC ATC Binalonan continues to strengthen its commitment to sustainable campus development.
