

Located in Barangay Canarvacanan, Binalonan, Pangasinan, the WCC Aeronautical and Technological College, Inc., Binalonan Campus serves as the institution's main site for academic instruction and aviation training operations. Established in 2005, the campus represents WCC-ATC's vision of advancing aeronautical and technological education in Northern Luzon, combining higher education with hands-on flight experience.

The 223,609 square-meter campus integrates academic, administrative, and operational zones within a unified aviation ecosystem. A central feature of the campus is the Binalonan Airfield, encompassing 103,521 square meters with an 850 to 900 meter runway dedicated to flight instruction and general aviation. Its proximity to classrooms, hangars, and laboratories allows students to engage in authentic aviation training within a safe and controlled learning environment. The site's location, approximately two kilometers from the Binalonan town proper, ensures accessibility to commercial services, transportation, and accommodations while maintaining a focused and secure academic atmosphere.
